

Co-operatives build a better world

Raiffeisenbank Lech is such a co-operative, i.e. a form of company in which people voluntarily join together to pursue economic, social or cultural goals. The members of a co-operative are both owners and users of the company. A co-operative primarily serves the interests of its members, has a democratic structure ('one person, one vote' principle) and is based on the principle that members help each other and take responsibility for the joint enterprise.

The advantages of co-operative banks are obvious: the bank belongs to the local people, they receive personal advice with a connection to the region, the members help each other indirectly and can vote on important decisions. The bank thus stands for responsible business practices and long-term stability - after all, Raiffeisenbank Lech has been around since 1901.

It's blooming around Lech am Arlberg

TRIFOLIUM PRATENSE

Red Clover

This red clover is a true all-rounder. On the one hand there are its pink flowers, on the other the sweet nectar inside the flower. Red clover is a popular forage plant and a soil conditioner. And a medicinal plant, for example for coughs and colds.

A well-rounded challenge

Hike around the Arlberg Pass, which connects Tyrol and Vorarlberg. In the midst of fascinating high alpine landscapes that demand both stamina and surefootedness over this three-day hike. Enjoy authentic hospitality and well-deserved comfort in the villages in the evening, before the mountain beckons again the next morning. It is scenarios like these that make the heart of every passionate hiker skip a beat.

All made possible by the new Arlberg Trail, which enables hikers to explore in wonderfully relaxed style, accompanied by the customary top quality for which this alpine pass region has always been appreciated. The well signposted circular hiking trail encompasses a total length of 50 kilometres (incl. lifts), almost a fifth of which is covered by cable car. The total walking time is around 18 hours. A nice challenge, even for those mountain enthusiasts who have already racked up plenty of alpine experience.
